

New & Improved Reel Handling Solutions

The Reel Thing®

The *Reel Thing*® is the tool that lets one man lift, stack, and spin heavy spools for payout operations. It's easy to use and affordable, saving you time and money.

The *Reel Thing* gives you more lift. With higher load ratings, stamped right on the tool, you can use The *Reel Thing* for greater range of reel weights. We've increased the load capacity for model RT-20 from 2000 to 3000 lbs, while model RT-40 increased from 4000 to 4500 lbs.

The *Reel Thing* is more versatile. With a new flipping feature, this multi-use tool gives you more flexibility in the warehouse and in the field. The RT-20 and RT-40 models allow you to safely flip a reel from rolling to non-rolling position.

The *Reel Thing* is even safer to operate. Independent laboratory tested with ASME code stamped right on the toggle bar gives you the assurance of safe operation.

Light enough to carry in one hand but strong enough to lift over five tons, the *Reel Thing* is an invaluable tool in the warehouse and out in the field. With the *Reel Thing*, laying underground cable is a snap. Simply suspend the reel over a trench and go. Any lifting equipment becomes a dereeling machine.

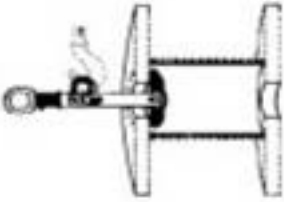

Model RT-40
